### Special Projects

---

**Android App Project:** Worked on class project to create an Android application using Android Studio.  
**Github:** <https://github.com/aam659/SpiceApp> 25 April, 2018

**Movie Database Project:** Worked on class project to simulate movie theatre website using PHP and SQL.  
**Github:** <https://github.com/njvanhaute/cs301-phase3> 7 Dec., 2018

**Personal Website:** Worked on personal portfolio website using Gatsby.js for front end, and GraphQL and Wordpress for the back end.  
**Github:** <https://github.com/aam659/PersonalSite> 17 June, 2018

### Skills and Experience

---

**Programming:** C/C++ (Advanced), HTML (Advanced), CSS (Advanced), Javascript (Advanced), Python (Basic), LaTeX (Basic), SQL (Basic), Java (Basic), VHDL (Basic), and MATLAB (Basic).

**Development:** Experience with Linux, Angular, NgRx, React, Redux, Gatsby.js, Bootstrap 4, and React-Native for web and mobile app development

**Other:** Mathematics and music background, with ability to perform many classical piano repertoire.

### Relevant Courses

---

**Software Design and Engineering:** Led software team in developing software model using Java.  
**Skills Acquired:** Studied various program life cycle models, UML, and other techniques.

**Data Structures and Algorithms:** Analyzed various algorithms in several programs using C.  
**Skills Acquired:** Studied and implemented many different algorithms and data structures.

**Microcomputers:** Designed and implemented several programs for the PIC-24 device using C and assembly  
**Skills Acquired:** Studied the PIC-24 microcontroller, as well as other microprocessor concepts.

### Education

---

<b>The University of Alabama</b> , Tuscaloosa, AL	
<b>Post-Graduate (Bachelor of Science) in Computer Science</b>	2019
GPA: 3.75,	
<b>Murray State University</b> , Murray KY	
<b>Master of the Arts in Mathematics</b> ,	2015
<b>Murray State University</b> , Murray, KY	
<b>Bachelor of Science in Mathematics</b> ,	2013

### Relevant Experience

---

#### Technologist Engineer I, Fidelity National Information Services

*Software Engineer, June 2019 – Present*

- Developing both front-end and back-end financial software applications to aid FIS Global in their mission to empower the financial world and help others
